Subject: Pembrokeshire Coast NPA Local Development Plan

18th June 2019

To Mrs Caroline Llewellyn
LDP Programme Officer
Pembrokeshire Coast National Park Authority

Dear Mrs Llewellyn

Thank you for granting us an extended deadline; here is our submission. Please note that we do not intend to submit any further written statements prior to the hearings we will be attending.

REGARDS

Christopher Jessop
Vice Chairman
Marloes & St Brides Community Council

SUBMISSION FOLLOWS

Further to our previous commentary on the PCNPA deposit LDP, in the light of recent extremely important and far-reaching developments relating to Climate Change, Marloes & St Brides Community Council asks that extra text is added, as follows:

PAGE 18

Section C Climate change, sustainable design, renewable energy, flooding

Text to be inserted immediately below section heading:

On 29th April 2019 the Welsh Government declared a Climate Emergency, and on 11th June 2019 the UK Government legally committed Great Britain to achieving net zero carbon emissions by 2050. Because this Deposit Plan predates the

above actions, it is thus in many respects rendered obsolete, and cannot be adopted as National Park policy as it stands. Therefore, this Deposit Plan will have to be heavily revised in the light of the Climate Emergency, reflecting revised Welsh and UK renewable energy generation and other emission targets, plus new projections on sea level rise and ocean acidification, etc.
